

ENVIRONMENTAL POLICY

CBL (Chemical and Biopharmaceutical Laboratories) is a global peptide manufacturing technology company founded in 1990, to provide the industry with novel chemistries in key areas of solid phase peptide and organic synthesis.

Being equipped with state of the art technology and employing appropriately trained and experienced staff, our company ensures the production of high quality products. In this direction, and seeking continuous improvement in our operating partnership, we proceeded to the implementation of the System of Good Manufacturing Practice producing products which are safe for human health.

Our company recognizes the importance of protecting and preserving the environment as an integral part of good and socially responsible behavior of an enterprise and is committed to implement an Environmental Management System in accordance with the principles of ISO 14001: 2004 standard throughout the range of its operation, aiming at minimizing the impact of its activities on the environment.

Company's Environmental Policy is based on the following principles:

- ✓ fully compliance with provisions of current National and European legislation. The company has been provided with all legislative permissions and approvals concerning its activities and is fully consistent with the environmental conditions and limits that must observe.
- ✓ constantly update on trends and amendments to environmental legislation
- ✓ Identification of all environmental aspects arising from its activities. CBL identifies the aspects that are likely to have significant environmental impacts and shall take all necessary measures to anticipate and prevent these environmental impacts
- ✓ Implementation programs to recycle raw materials used in the production of products
- ✓ Setting of environmental objectives, targets and programs and ensure their achievement.
- ✓ Operates of an effective waste management system in cooperation with licensed operators.

Makes rational use of natural and energy resources and make use of equipment and instruments new, environmentally friendly technology where possible.

- ✓ Monitoring all aspects of its operation which may affect the environment, ensuring the compliance with the allowable emission limits of current legislation.
- ✓ Implementation of ISO 26000 principles including guidelines and best practices on the principles of Corporate Social Responsibility (CSR Corporate Social Responsibility).
- ✓ rational use of natural and energy resources and use of state of the art equipment and instruments and environmentally friendly technology where possible.

Our goal is the continuous improvement of our environmental performance and the reduction of the environmental footprint of our activities.

To achieve the objectives above, top management is committed to provide the necessary resources for the unhindered, efficient and effective operation of the company and of the system.

The Environmental Management System is reviewed at regular intervals with regard to its completeness and effectiveness. Also, it is amended whenever it is necessary and simultaneously it is communicated to staff.
